

Autism Parent Training and Social Skills Programs [STAR Specialties](#) has recently formed a close affiliation with Vista Hill. STAR Specialties (Support, Training, Assessment and Research) is a local leader in clinically-based social skills training for children and teens with autism. STAR Specialties' newest program is called Family Intensive Training (F.I.T.) and provides assessment and time limited group behavioral training for parents and children diagnosed with autism. F.I.T. teaches parents how to support their child's social behavior and manage problem behaviors that interfere with social success. Visit STAR at www.starspecialties.org to learn more about F.I.T., the ABC Parenting Series (online child behavior training) and other autism services.
